

HIX HEAT TRANSFER MACHINES

PRESTO15
ECONOMY
15"x15"

Economical yet perfect for applying all types of transfers including plastisol, foils, sublimation and inkjet. Individually numbered and repeatable pressure settings give you the correct pressure every time. Easy to use temperature control (0-450 degrees) with heat indicator light. Battery timer now included.
Weight 65lbs 120 Volts 12.5 Amps

\$689

HT400D
DELUXE
15"x15"

Best Seller

Sets the standard in the manual heat press industry because of its ruggedness, durability and years of trouble free performance. New handle provides 20% more pressure. Floating lower platen gives perfect alignment on all items up to 1" thick. Features include auto-reset digital timer, full range pressure control, thermometer (up to 450 deg)& heat indicator light. Weight 79lbs 120 Volts 12.5 Amps

\$955

Swing away design for easy layout away from the heat. Full range pressure control for items up to 1" thick. Temp goes up to 400 degrees. Includes heat indicator light, easy to use pressure lever and a sturdy support base. Economical and perfect for the hobbyist who wants to apply inkjet, sublimation and flock transfers.
Weight 28lbs
120 Volts
7 Amps

HL912

Hobby Lite \$325

Cap Press
B250D

\$660

Turns caps into walking advertising for your customers, teams and more! Sturdy design with a strong support base. Interchangeable 3"x5 1/2" lower platen for golf caps is included. (3 3/4" x 5 7/8" for baseball or 2 3/4" x 5 1/4" for youth are \$65 each). Includes pressure adjustment, 60-second auto reset timer, thermostat (0-450 degrees) and handy cap attachment. Optional leather blanket holds transfers and numbers in place. 120 Volts 4 Amps

Flat Press
FH3000

\$715

3-3/4"x6-1/4" Flat Press is great for umbrella, pockets, sleeves, cuffs, collars, bags, name badges, luggage tags, tiles, gloves & much more. Optional cube attachment for doing cube shaped items.
Weight 32lbs
120 Volts 4 Amps

\$695

Mug Press

Turn mugs into profit! Simple to use analog timer and temperature controls. Rapid heat up from idle temperature. Heater design is durable and long lasting. Compact, sturdy and portable for malls, flea markets, shows & more.
Weight 19lbs
120 Volts 4.2 Amps

HIX HEAT TRANSFER MACHINES

PRESTO20

Economical for a startup shop or as an extra press to do daily production needs. New handle design provides 20% more pressure. Floating lower platen gives perfect alignment on all items up to 1" thick. Fully adjustable pressure control. Easy to use temperature control (0-450 degrees) with heat indicator light. Battery timer now included.
Weight 90lbs 120 Volts 14.5 Amps NEMA 5-20 20A Plug

\$925

HT600D

Best Seller

The workhorse of the manual heat press industry that is rugged and durable for years of trouble free performance. New handle provides 20% more pressure. Floating lower platen gives perfect alignment on all items up to 1" thick. Features include auto-reset digital timer, full range pressure control, thermometer (up to 450 deg)& heat indicator light. Weight 91lbs 120 Volts 14.5 Amps NEMA 5-20 20A Plug

\$1,175

Air-Automatic
16"x20"

N880D

Air assist helps reduce operator fatigue. Features include auto-reset timer, psi pressure setting, thermometer, thermostat, heat indicator light, and pre-pressure release button. Optional Shuttle Attachment (see below) significantly increases output. Customer must supply air compressor.
Weight 139 lbs 120 Volts 14.5 Amps NEMA 5-20 20A Plug
220 Volt unit is available for \$45 extra charge

\$2,550

Commercial Air-Automatic
16"x20"

C800D

Tough, heavy duty machine designed for extensive use in shops that do extra high volume work. Air assist helps reduce operator fatigue. All the features of the N840 plus the machine has beefed up electronics and mechanical parts. Optional Shuttle Attachment (see below) significantly increases output. Customer must supply air compressor.
Weight 139 lbs 120 Volts 14.5 Amps NEMA 5-20 20A Plug
220 Volt unit is available for extra charge

\$2,895

Shuttle Attachment

For use with the air automatic N840 or C800 heat transfer machines. Significantly increases the production output by providing two work stations. Allows operator to layout the next product while one is still transferring. Heavy duty shuttle blanket is constructed of Teflon coated fiberglass. Mounts easily into existing holes already drilled into the machine. (heat press is not included)
